For Boxed Warning and Medication Guide, see @botoxcosmeticpi.

The JUVÉDERM® Collection of Fillers and BOTOX® Cosmetic may help you achieve your unique aesthetic goals in different ways. Learn how each treatment may deliver natural-looking results*† at [WhichTreatmentsAreRightForYou.com](https://www.WhichTreatmentsAreRightForYou.com) 🗨️

*For BOTOX® Cosmetic, full results are seen in 30 days. In two clinical trials, a majority of patients reported they were “Mostly or Very Satisfied” with their overall treatment results at Day 60. In addition, these patients reported the same responses for the natural-looking result of treatment for their frown and forehead lines. In a 2022 survey, a majority of respondents treated for their crow’s feet lines said they “Completely or Somewhat Agree” that BOTOX® Cosmetic provides natural-looking results.

†For forehead lines, frown lines, and crow’s feet only.

The safe and effective use of these treatments has not been studied together.

Keep watching for JUVÉDERM® Collection of Fillers Uses and Important Safety Information.

BOTOX® Cosmetic (onabotulinumtoxinA) is a prescription medicine that is injected into muscles and used to temporarily improve the look of moderate to severe forehead lines, crow’s feet and frown lines in adults.

-

Talk to your doctor about BOTOX® Cosmetic and whether it’s right for you. There are risks with this product—the effects of BOTOX® Cosmetic may spread hours to weeks after injection causing serious symptoms. Alert your doctor right away as difficulty swallowing, speaking, breathing, eye problems or muscle weakness can be a sign of a life-threatening condition. If this happens, do not drive a car, operate machinery, or do other dangerous activities. Patients with these conditions before injection are at the highest risk. Swallowing problems may last for several months. Side effects may include allergic reactions, neck and injection-site pain, fatigue and headache. Don’t receive BOTOX® Cosmetic if there’s a skin infection. Tell your doctor your medical history, muscle or nerve conditions, and medications, including botulinum toxins, as these may increase the risk of serious side effects.

-

Intended for U.S. audiences only.
