A personalized approach to achieving
your body contouring goals.

#1

**Nonsurgical Fat
Reduction Treatment***

Jazmine was treated with CoolSculpting® Elite on her abdomen, flanks, upper arms and thighs. Results may vary.

*CoolSculpting® is the treatment doctors use most for nonsurgical fat reduction.

Uses

CoolSculpting® and **CoolSculpting® Elite** are FDA-cleared for the treatment of visible fat bulges in the submental (under the chin) and submandibular (under the jawline) areas, thigh, abdomen, and flank, along with bra fat, back fat, underneath the buttocks (also known as banana rolls), and upper arm. It is also FDA-cleared to affect the appearance of lax tissue with submental area treatments. **CoolSculpting®** and **CoolSculpting® Elite** are not treatments for weight loss.

Please see additional Important Safety Information on next page.

Your Journey Isn't One-Size-Fits-All

It's Permanent

A nonsurgical way to help sculpt your body by freezing and eliminating treated fat cells—for good.

It's Proven

CoolSculpting® has been **FDA-cleared** for more than 14 years, and its safety and effectiveness have been evaluated in clinical studies worldwide.

It's Personal

Because **every body is different**, CoolSculpting® delivers visible results in 9 different areas—allowing for a personalized treatment approach.

Jazmine, Kenid, and Candice were treated on their abdomen and flanks with CoolSculpting® Elite. Jazmine was also treated on her thighs and upper arms. Kenid was also treated on her bra and back fat. Candice was also treated on her thighs, banana rolls, and upper arms. Results may vary.

Important Safety Information

This procedure is not for everyone. You should not be treated with **CoolSculpting®** or **CoolSculpting® Elite** if you suffer from cryoglobulinemia, cold agglutinin disease, or paroxysmal cold hemoglobinuria.

Please see additional **Important Safety Information** on next page.

Losing stubborn fat isn't easy.
CoolSculpting® may help **deliver the**
sculpted results you're looking for.

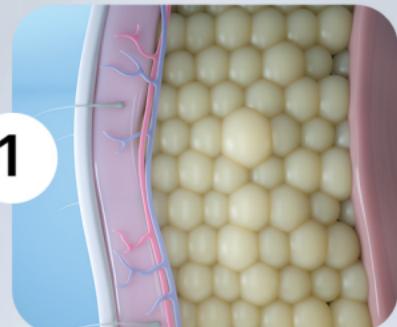

CoolSculpting® can provide a
finishing touch to your journey.

coolsculpting®

It's Permanent

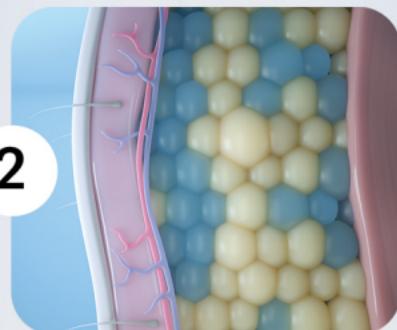

Stubborn fat

Subcutaneous fat before treatment with CoolSculpting®.

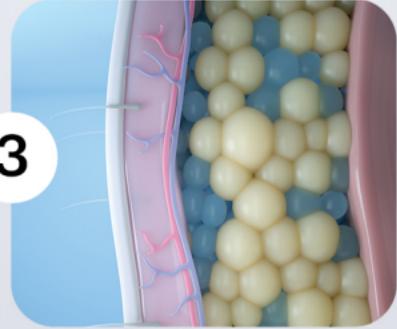

Fat cells frozen

Controlled cooling gently and effectively targets fat cells underneath the skin while leaving the surrounding tissue unaffected. Treated fat cells are frozen and then die.

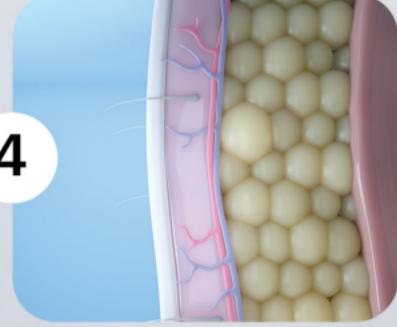

Fat cells eliminated

In the weeks to months that follow, the body naturally processes the treated fat and eliminates these dead cells.

Gone for good

After CoolSculpting® treatment, eliminated fat cells are gone for good.

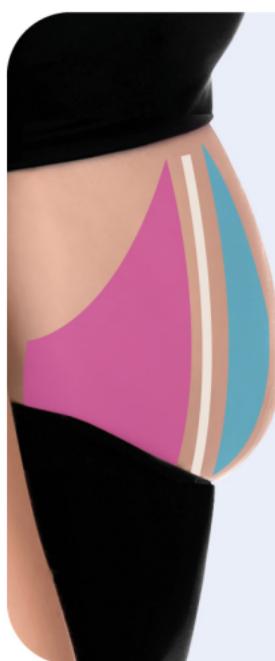

Important Safety Information (continued)

Tell your doctor if you are pregnant or have any medical conditions including recent surgery, pre-existing hernia, and any known sensitivities or allergies. During the procedure you may experience sensations of pulling, tugging, mild pinching, intense cold, tingling, stinging, aching, cramping and discomfort at the treatment site.

Please see additional Important Safety Information on next page.

CoolSculpting® works differently than diet and exercise to eliminate stubborn fat.

Subcutaneous Fat

Pinchable fat found beneath the skin.

Can be treated with CoolSculpting®.

Abdominal Wall

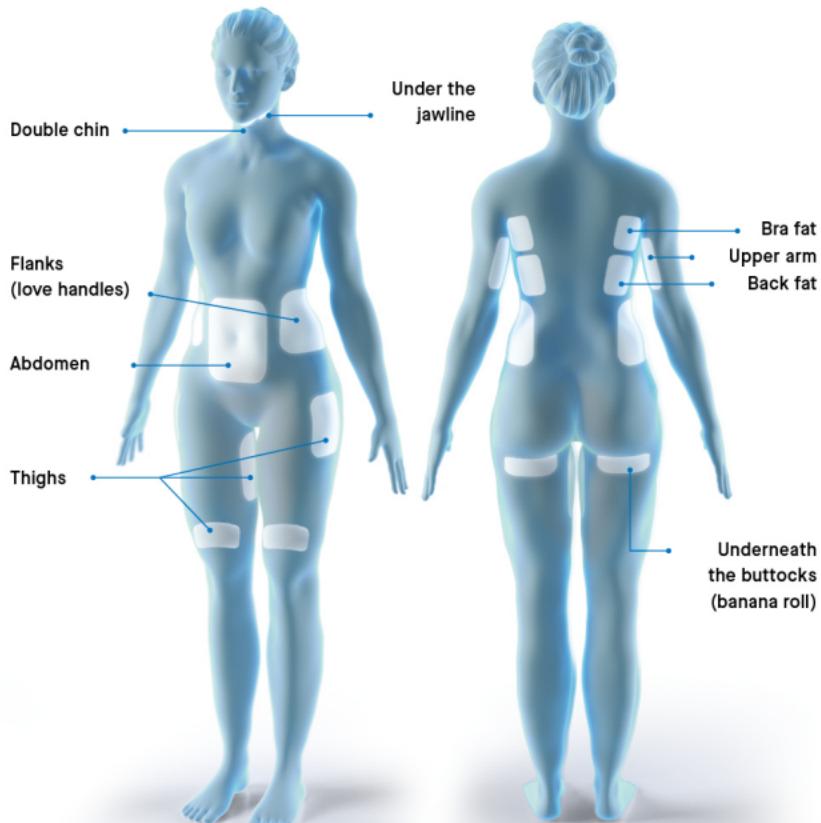

Muscle and tissues that separate visceral and subcutaneous fat.

Visceral Fat

Found beneath the abdominal wall and surrounds internal organs. CoolSculpting® is not indicated for visceral fat.

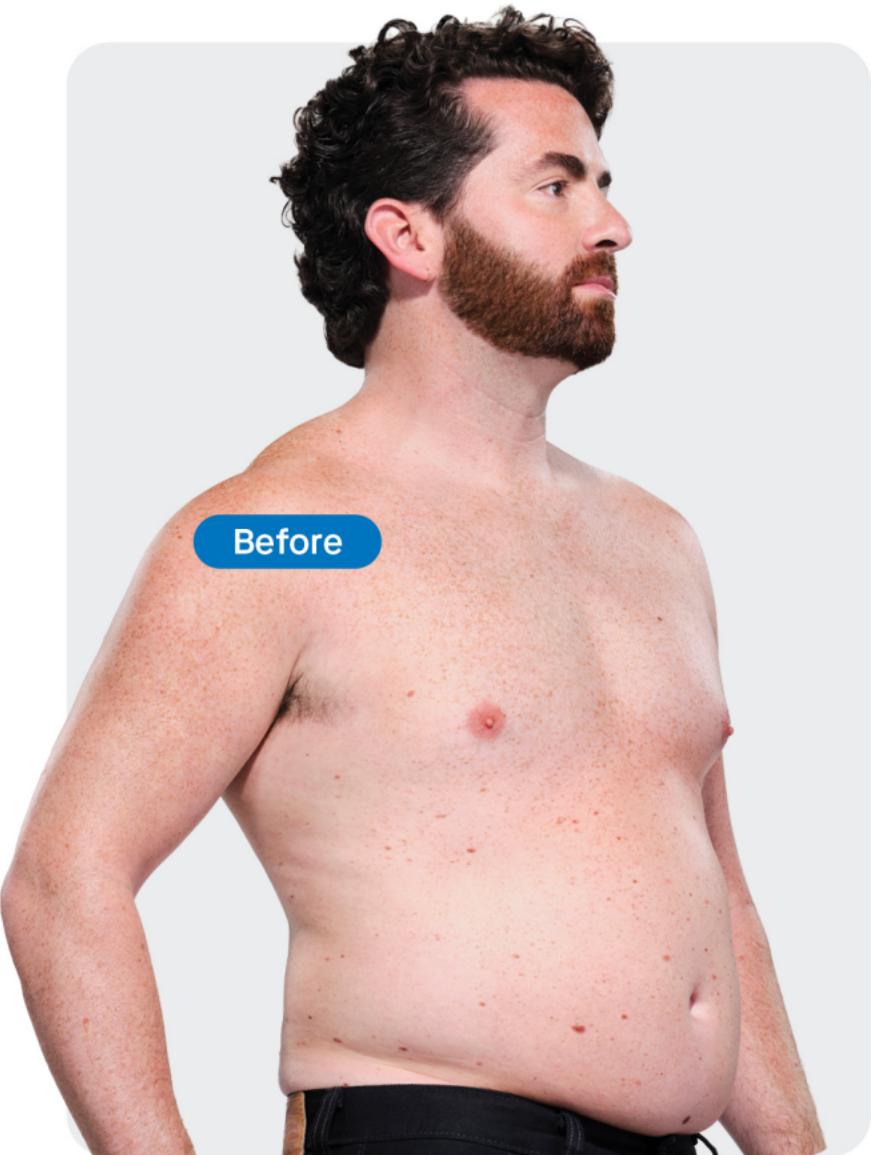

Image does not reflect actual results.

Treats 9 different areas of the body, so your treatment plan can focus on what matters most to you.

It's Proven

With more than **17 million treatments** performed worldwide, CoolSculpting® delivers proven results.

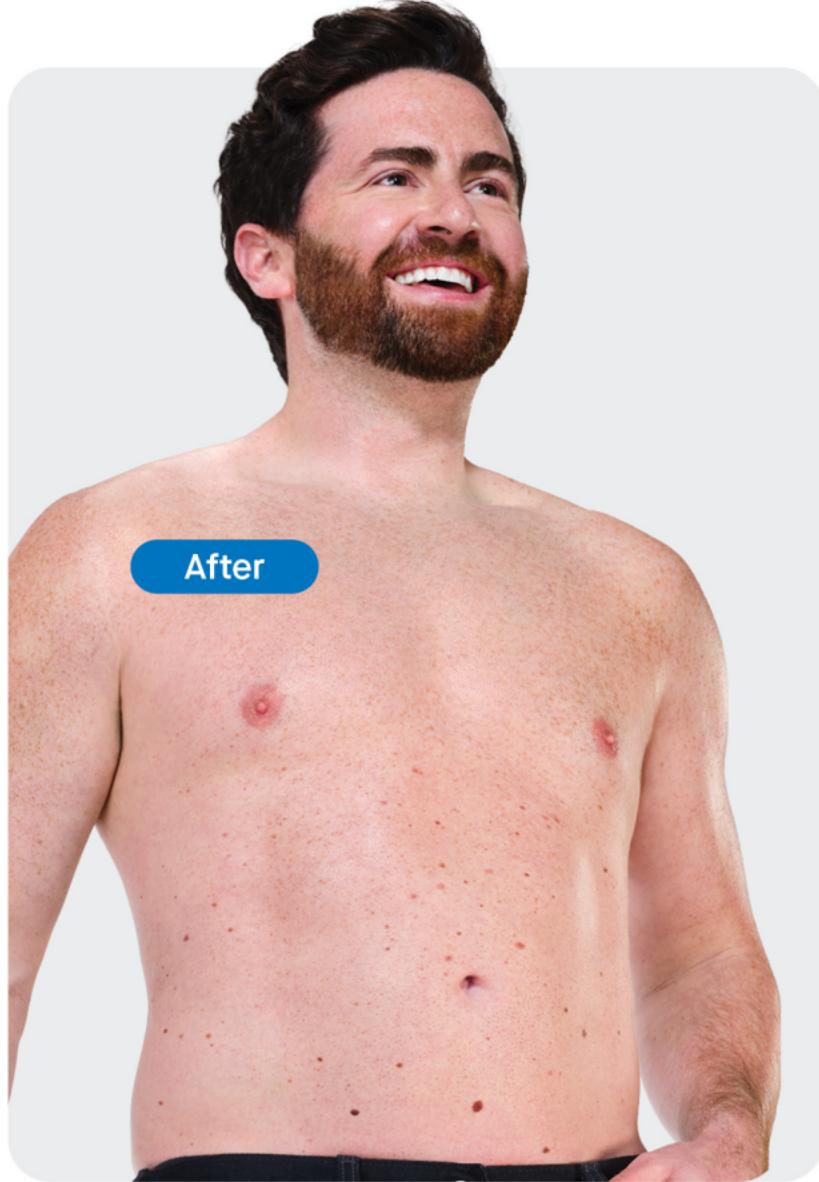

Important Safety Information (continued)

These sensations lessen as the area becomes numb. Following the procedure, typical side effects include temporary redness, swelling, blanching, bruising, firmness, stinging, tenderness, cramping, skin inflammation and aching.

Please see additional Important Safety Information on next page.

CoolSculpting® is a noninvasive treatment with **little to no downtime**—so you can usually get back to your routine right after your visit.

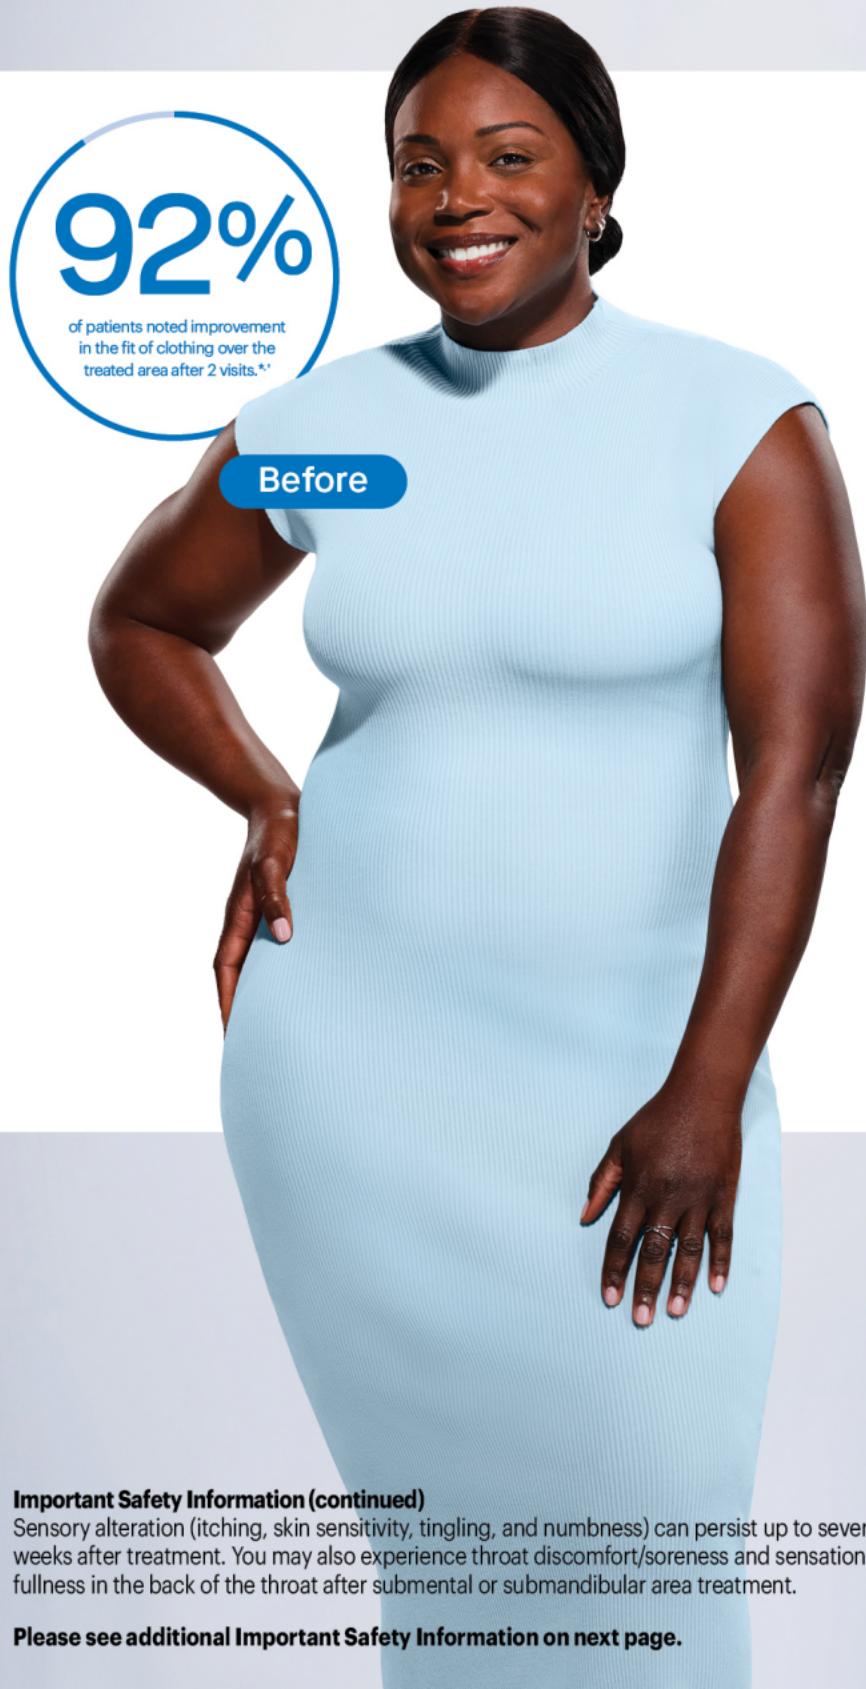

14 weeks after 3 treatment visits.

Ryan was treated with CoolSculpting® Elite on his abdomen, flanks, thighs and double chin. Results may vary.

coolsculpting®

It's Personal

CoolSculpting® treatment plans are personalized to help you work toward body contouring goals like **fitting better in your clothes** and sculpting areas that matter most to you.

Important Safety Information (continued)

Sensory alteration (itching, skin sensitivity, tingling, and numbness) can persist up to several weeks after treatment. You may also experience throat discomfort/soreness and sensation of fullness in the back of the throat after submental or submandibular area treatment.

Please see additional Important Safety Information on next page.

“It just feels great being able to put on my clothes and not have to worry about bulging around my abs and bra line.”

Kenid, Age 41

After

12 weeks after three CoolSculpting® Elite treatments on Kenid's abdomen, flanks, back fat and bra fat. Kenid lost 12.4 lb due to diet and exercise. CoolSculpting® is not a weight loss procedure. Results may vary.

Your provider will design a treatment plan based on your aesthetic body contouring goals.

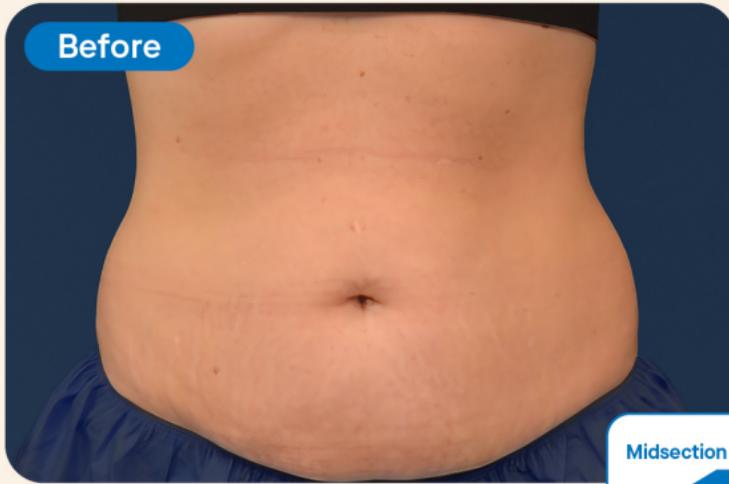

*In a study, 96 patients received CoolSculpting® Elite treatments on the midsection (abdomen and flanks). 94 patients received two treatment visits and 2 patients received one treatment visit. The primary goal was to evaluate patient satisfaction captured by a survey.

coolsculpting®

What to know before you Sculpt It:

Q: Is CoolSculpting® a weight loss treatment?

A: No—CoolSculpting® is a fat reduction treatment, not a weight loss solution. Losing weight doesn't always lead to a more sculpted appearance—but fat reduction can change the shape and contours of your body, giving you that desired finishing touch.

Q: How many treatments will I need to see results?

A: Many patients see noticeable improvement after 2 treatment visits*,†, with results typically beginning in 1–3 months. Your provider will create a customized treatment plan for you.

Q: How long will the results of my CoolSculpting® treatments last?

A: Once treated fat cells have been eliminated by the body, they are gone for good. It is important to continue to exercise and eat well to help maintain your results. Results and patient experience may vary.
