Natrella[®] Breast Implants IMPORTANT SAFETY INFORMATION

Breast implants are not lifetime devices. The longer patients have them, the greater the chance they will develop complications, which may require more surgery. Breast implants have been associated with a cancer of the immune system called breast implant-associated anaplastic large cell lymphoma (BIA-ALCL). Some patients have died from BIA-ALCL. Patients have also reported a variety of systemic symptoms such as joint pain, muscle aches, confusion, chronic fatigue, autoimmune diseases, and others.

Natrella[®] Breast Implants are for breast augmentation and revision surgery in women at least 22 years old for silicone-filled implants and women at least 18 years old for saline-filled implants.

You should not get breast implants if you currently have an active infection, untreated breast cancer or precancer, or are pregnant or nursing. Tell your doctor about any conditions you have, any medications you are taking, and any planned cancer treatments. Breast implantation is likely not a one-time surgery. Having implants removed and not replaced may lead to permanent cosmetic changes of the breasts. Breast implants may affect breastfeeding. Gel implants may rupture without symptoms, so periodic imaging after surgery is recommended.

Key complications are reoperation, implant removal, implant rupture, implant deflation with saline-filled implants, and severe capsular contracture.

Talk to your doctor for more information.

The use of Natrella[®] Breast Implants is restricted to licensed physicians who provide information to patients about the risks and benefits of breast implant surgery.

BOTOX[®] Cosmetic Approved Uses and Important Safety Information

Approved Uses

BOTOX[®] Cosmetic is a prescription medicine that is injected into muscles and used to temporarily improve the look of moderate to severe forehead lines, crow's feet lines, and frown lines between the eyebrows in adults.

IMPORTANT SAFETY INFORMATION

BOTOX[®] Cosmetic may cause serious side effects that can be life threatening. Get medical help right away if you have any of these problems any time (hours to weeks) after injection of BOTOX[®] Cosmetic:

- **Problems swallowing, speaking, or breathing**, due to weakening of associated muscles, can be severe and result in loss of life. You are at the highest risk if these problems are pre-existing before injection. Swallowing problems may last for several months.
- **Spread of toxin effects.** The effect of botulinum toxin may affect areas away from the injection site and cause serious symptoms including: loss of strength and all-over muscle weakness, double vision, blurred vision and drooping eyelids, hoarseness or change or loss of voice, trouble saying words clearly, loss of bladder control, trouble breathing, and trouble swallowing.

BOTOX[®] Cosmetic dosing units are not the same as, or comparable to, any other botulinum toxin product.

There has not been a confirmed serious case of spread of toxin effect when BOTOX[®] Cosmetic has been used at the recommended dose to treat frown lines, crow's feet lines, and/or forehead lines.

BOTOX[®] Cosmetic may cause loss of strength or general muscle weakness, vision problems, or dizziness within hours to weeks of taking BOTOX[®] Cosmetic. **If this happens, do not drive a car, operate machinery, or do other dangerous activities.**

Serious and/or immediate allergic reactions have been reported. They include: itching, rash, red itchy welts, wheezing, asthma symptoms, or dizziness or feeling faint. Get medical help right away if you are wheezing or have asthma symptoms, or if you become dizzy or faint.

Do not receive BOTOX[®] Cosmetic if you: are allergic to any of the ingredients in BOTOX[®] Cosmetic (see Medication Guide for ingredients); had an allergic reaction to any other botulinum toxin product such as Myobloc[®] (rimabotulinumtoxinB), Dysport[®] (abobotulinumtoxinA), or Xeomin[®] (incobotulinumtoxinA); have a skin infection at the planned injection site.

Tell your doctor about all your medical conditions, such as ALS or Lou Gehrig's disease, myasthenia gravis, or Lambert-Eaton syndrome, as you may be at increased risk of serious side effects including difficulty swallowing and difficulty breathing from typical doses of BOTOX[®] Cosmetic.

Tell your doctor about all your medical conditions, including: plans to have surgery; had surgery on your face; have trouble raising your eyebrows; drooping eyelids; any other abnormal facial change; are pregnant or plan to become pregnant (it is not known if BOTOX[®] Cosmetic can harm your unborn baby); are breast-feeding or plan to (it is not known if BOTOX[®] Cosmetic passes into breast milk).

Tell your doctor about all the medicines you take, including prescription and over-the-counter medicines, vitamins and herbal supplements. Using BOTOX[®] Cosmetic with certain other medicines may cause serious side effects. **Do not start any new medicines until you have told your doctor that you have received BOTOX[®] Cosmetic in the past.**

Tell your doctor if you have received any other botulinum toxin product in the last 4 months; have received injections of botulinum toxin such as Myobloc[®], Dysport[®], or Xeomin[®] in the past (tell your doctor exactly which product you received); have recently received an antibiotic by injection; take muscle relaxants; take an allergy or cold medicine; take a sleep medicine; take aspirin-like products or blood thinners.

Other side effects of BOTOX[®] Cosmetic include: dry mouth; discomfort or pain at the injection site; tiredness; headache; neck pain; and eye problems: double vision, blurred vision, decreased eyesight, drooping eyelids and eyebrows, swelling of your eyelids and dry eyes.

For more information refer to the Medication Guide or talk with your doctor.

To report a side effect, please call Allergan at 1-800-678-1605.

JUVÉDERM[®] VOLBELLA[®] XC and JUVÉDERM[®] Ultra XC Important Information

APPROVED USES

JUVÉDERM[®] Ultra XC is for injection into the mid-to-deep dermis for correction of moderate to severe facial wrinkles and folds (such as nasolabial folds).

JUVÉDERM[®] VOLBELLA[®] XC injectable gel is for injection into the lips for lip augmentation and for correction of perioral lines in adults over the age of 21.

JUVÉDERM[®] Ultra XC is for injection into the lips and perioral area for lip augmentation in adults over the age of 21.

IMPORTANT SAFETY INFORMATION

Are there any reasons why I should not receive JUVÉDERM[®] VOLBELLA[®] XC or JUVÉDERM[®] Ultra XC injectable gels?

Do not use these products if you have a history of multiple severe allergies or severe allergic reactions (anaphylaxis), or if you are allergic to lidocaine or Gram-positive bacterial proteins used in these products.

What precautions should my doctor advise me about?

- Tell your doctor if you are pregnant or breastfeeding. The safety of these products for use during pregnancy or while breastfeeding has not been studied.
- The safety of JUVÉDERM[®] VOLBELLA[®] XC in patients under 22 years, and the safety of JUVÉDERM[®] Ultra XC in patients under 18 years, has not been studied.
- The safety and effectiveness of JUVÉDERM[®] VOLBELLA[®] XC in areas other than the lips and perioral area have not been established in controlled clinical studies.
- The safety and effectiveness of JUVÉDERM[®] Ultra XC for areas other than the lips and perioral area for lip augmentation, or for facial wrinkles and folds, have not been established in controlled clinical studies.
- Tell your doctor if you have a history of excessive scarring (eg, hypertrophic scarring and keloid formations) or pigmentation disorders, as use of these products may result in additional scars or changes in pigmentation.
- Tell your doctor if you are planning other laser treatments or a chemical peel, as there is a possible risk of inflammation at the treatment site if these procedures are performed after treatment.
- Patients who experience skin injury near the site of injection with these products may be at a higher risk for side effects.
- Tell your doctor if you are on immunosuppressive therapy used to decrease the body's immune response, as use of these products may result in an increased risk of infection.
- Tell your doctor if you are using medications that can prolong bleeding, such as aspirin, ibuprofen, or other blood thinners, as this may result in increased bruising or bleeding at the injection site.
- Minimize strenuous exercise, exposure to extensive sun or heat, and alcoholic beverages within the first 24 hours following treatment.

What are possible side effects?

The most common side effects included swelling, tenderness, bruising, firmness, lumps/bumps, redness, pain, discoloration, itching, and dryness. For JUVÉDERM[®] VOLBELLA[®] XC, side effects were predominantly mild or moderate, with a duration of 30 days or less. With JUVÉDERM[®] Ultra XC injectable gel, most side effects were mild or moderate and lasted 14 days or less.

One of the risks with using these products is unintentional injection into a blood vessel, and, while rare, the complications can be serious and may be permanent. These complications, which have been reported for facial injections, can include vision abnormalities, blindness, stroke, temporary scabs, or permanent scarring.

As with all skin injection procedures, there is a risk of infection.

To report a side effect with JUVÉDERM[®] VOLBELLA[®] XC or JUVÉDERM[®] Ultra XC, please call Allergan at 1-800-433-8871. Please also visit [Juvederm.com](#) for more information.

Available by prescription only.

Natrella Perks[®] Terms and Conditions

- Allē Members who undergo breast augmentation with Natrella[®] gel implants ("Member") may qualify to receive either (a) one (1) complimentary treatment of BOTOX[®] Cosmetic (onabotulinumtoxinA) up to 50 units OR (b) one (1) complimentary treatment of JUVÉDERM[®] Ultra XC up to two .55 mL syringes at participating Allē provider offices only.
