

A close-up portrait of three women with different skin tones and hair colors, looking directly at the camera. The woman at the top is Black with short dark hair. The woman at the bottom left is of mixed heritage with light brown hair. The woman at the bottom right is White with light brown hair. They are all wearing minimal makeup, emphasizing their natural skin tones.

SKINMEDICA®

# Even & Correct

*Customize and Correct*

# The way to *even skin tone*

Hyperpigmentation is the clinical term for uneven discoloration of the skin. This is caused by an excess production of melanin, a pigment that gives skin its color. Persistent unwanted discoloration over time may indicate a chronic skin condition.

Many factors contribute to skin discoloration, from sun exposure to hormones to genetics to acne scarring. Without a professional diagnosis for treatment, you may struggle to accurately identify or describe uneven skin discoloration. Some common terms include dark spots, blotches, age spots, or stains. Understandably, you want a solution to restore your even skin tone.

## Did you *know*?

We're not born with common hyperpigmentation marks, such as freckles<sup>1</sup>

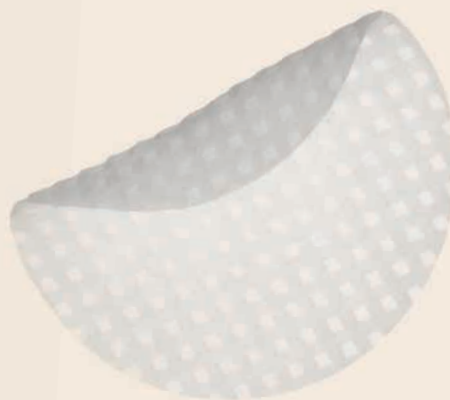

**65%** of African Americans experience symptoms of hyperpigmentation, and it's typically longer lasting and more challenging to treat in darker than lighter skin tones<sup>2</sup>

Discoloration presents in brown, red, and tan spots<sup>3</sup>

The most common types of hyperpigmentation are age spots, pregnancy mask, and injury to the skin<sup>4</sup>

SKINMEDICA®

# SkinMedica® Even & Correct

*Customize and Correct*

The SkinMedica® Even & Correct Collection is our most effective technology targeting hyperpigmentation. This clinically proven Collection is a customizable approach that helps target a broad spectrum of unwanted hyperpigmentation conditions. You'll see visibly brighter, more even skin tone in as little as one week.<sup>5</sup>

The Even & Correct Collection has been clinically shown to dramatically reduce the appearance of the most stubborn skin discoloration. It's been extensively researched and tested in clinical studies across a diverse range of ethnicities and skin types.<sup>5</sup>

Each of the products in the Collection is hydroquinone-free, so you can use each one daily and with prolonged, regular use. This system is *fully customizable*, to suit your skin's needs.

## Pads • Serum • Spot

### Even & Correct Advanced Brightening Treatment

A powerful daily serum to help target and prevent visible discoloration. This is designed to be a foundation in your daily regimen.

### Even & Correct Dark Spot Cream

A heavy-duty, targeted, fast-acting spot treatment booster that reduces the appearance of dark spots. For use as needed.

### Even & Correct Brightening Treatment Pads

Alcohol-free brightening pads exfoliate for visibly bright skin. They prep your skin for absorption of treatment products.

SKINMEDICA®

# A breakthrough innovation

## Groundbreaking, *exclusive blend*

LTN Complex™ is exclusive to SkinMedica®. This signature, patent-pending technology is our most comprehensive approach to treat the appearance of skin discoloration.

### **Ultra-concentrated Lotus Sprout Extract**

Truly an innovative breakthrough, we have specifically engineered this naturally derived key ingredient for skincare use. The specialized extraction process harnesses the most powerful properties that address skin discoloration.

### **Tranexamic Acid**

This brightening agent effectively reduces the appearance of dark spots.

### **Niacinamide**

Acts as an antioxidant to reduce the appearance of skin discoloration, fine lines, and sallowness, yellow appearance.

These ingredients are a scientific breakthrough discovery in targeting multiple types of hyperpigmentation.

The melanin lifecycle, which regulates skin discoloration, was known to consist of 5 pathways. An additional pathway has been discovered, opening science to new possibilities in helping to treat and prevent visible hyperpigmentation. SkinMedica® has pioneered an innovative collection to target all these critical pathways related to the development of unwanted pigment in skin. **That's the power of Even & Correct.**

# The *fade away*

## SkinMedica® Even & Correct Advanced Brightening Treatment

Helps treat the appearance of melasma, and other stubborn hyperpigmentation conditions, and prevent the appearance of future discoloration in all skin types.<sup>5</sup>

A *brighter way*<sup>5,\*</sup>

93%

agreed it **reduced the appearance of sun spots** at week 12 (n = 41)

# In the *clear*

## SkinMedica® Even & Correct Brightening Treatment Pads

Add these alcohol-free daily brightening pads to your skincare routine. They prep your skin to help the absorption of treatment products. And they help reduce the appearance of dullness and uneven tone and texture, for visibly bright skin.

# Brighten up

These pads can be used *daily*  
to keep your skin renewed and fresh.

# SkinMedica® Even & Correct

Customized for all skin types

Use the Even & Correct Collection as needed.

**Even & Correct Advanced Brightening Treatment** is a core, twice-daily serum to help reduce the appearance of melasma, and other stubborn hyperpigmentation conditions, and prevent new discoloration from forming

**Even & Correct Dark Spot Cream** can be added as a heavy-duty booster to help decrease the appearance of stubborn dark spots

**Even & Correct Brightening Treatment Pads** can be used daily or as needed, for exfoliated, bright skin

When you use the Collection all together, you may see results in as little as *one week*.<sup>5</sup>
