Asset Name: GENERAL REEL 2

Frame 1

SKINVIVE by JUVÉDERM® injectable gel is for improving skin smoothness in the cheeks for adults over 21.

SKINVIVE by JUVÉDERM® is not for people who have a history of severe allergic reactions or allergies to any of its ingredients, including lidocaine. Tell your specialist if you have a history of scarring or taking medicines that decrease the body's immune response or that can prolong bleeding. Certain medicines and procedures may increase the risk of infection, inflammation, bleeding, or bruising at the injection site. Common side effects were lumps/bumps, swelling, redness, pain, itching, bruising, and discoloration. Additionally, there have been reports outside of the US of inflammation, nodules, unsatisfactory result or loss of/no improvement, allergic reaction, anxiety, blood vessel blockage, infection, dry skin, increase/decrease in sensation, and abscess. There is a rare risk of unintentional injection into a blood vessel with all dermal fillers which can cause vision abnormalities, blindness, stroke, temporary scabs, or permanent scarring. Delayed-onset inflammation and infection at the injection site are events associated with dermal filler injection.

Talk to your licensed specialist and for additional information, including Important Safety Information, visit www.SKINVIVE.com.
