Tell your doctor if you have a history of scarring or taking medicines that decrease the body's immune response or that can prolong bleeding. Common side effects include injection-site redness, swelling, pain, tenderness, firmness, lumps, bumps, bruising, discoloration, or itching.

As with all fillers, there's a rare risk of unintentional injection into a blood vessel, which can cause vision abnormalities, blindness, stroke, temporary scabs, or permanent scarring. JUVÉDERM® products should only be injected by a licensed and trained specialist. There is a risk of infection with all skin injection procedures.
