## 1. ORGANIC POST CAPTION:

For Boxed Warning and Medication Guide, see @botoxcosmeticpi.

**BOTOX® Cosmetic and the JUVÉDERM® Collection of Fillers treat different concerns in different areas of the face.**

Keep watching for JUVÉDERM® Collection of Fillers Uses and Important Safety Information.

BOTOX® Cosmetic (onabotulinumtoxinA) is a prescription medicine that is injected into muscles and used to temporarily improve the look of moderate to severe forehead lines, crow's feet, frown lines, and vertical bands connecting the neck and jaw in adults (platysma bands).

Talk to your doctor about BOTOX® Cosmetic and whether it's right for you. There are risks with this product—the effects of BOTOX® Cosmetic may spread hours to weeks after injection causing serious symptoms. Alert your doctor right away as difficulty swallowing, speaking, breathing, eye problems or muscle weakness can be a sign of a life-threatening condition. If this happens, do not drive a car, operate machinery, or do other dangerous activities. Patients with these conditions before injection are at the highest risk. Swallowing problems may last for several months. Side effects may include allergic reactions, neck and injection-site pain, fatigue and headache. Don't receive BOTOX® Cosmetic if there's a skin infection. Tell your doctor your medical history, muscle or nerve conditions, and medications, including botulinum toxins, as these may increase the risk of serious side effects.

Intended for U.S. audiences only.

**Fewer lines with BOTOX® Cosmetic. More volume with the JUVÉDERM® Collection of Fillers. BOTOX® Cosmetic temporarily improves the look of moderate to severe frown, forehead, and crow's feet lines in adults. The JUVÉDERM Collection of Fillers adds volume to specific areas of the face. Each treatment can help you achieve your unique aesthetic goals in different ways.**
